# PROGRESS TO DATE

- I read how-to guides found online, learned about the format that I have to convert the data to and how to do so (my “To Do” goal from last week)
- Created a high level mapping for the program to be written
- Got image and video up on the tile display wall using CgFX

# To Do

Format the city points data and  
get it into OSG database and  
up in COVISE

# Cultural Experiences: Nightlife!

Out on the town
