INTERACTIVE
MULTI-TOUCH
ARTWORK DISPLAY

Shaocong(Scott) Mo
NICT
July 6, 2012
PROGRESS update

- Added video player into the puzzle game; when user finishes the puzzle game, he/she can watch a video about the artwork as a reward
- Added multi-touch function into the puzzle game
- Added “More information” and “Main menu” buttons
- Changed background of the puzzle game to make it more appealing to the eye
Next Week

- Improve the layout of the puzzle
- Continue studying the API for the location based system
- Manually design the puzzle pieces and mask the pieces onto the images we currently have
When you eat with other people, you wait for them before you start. When you finish your meal, you wait for the people who are not finished yet.

- I eat very slow, so every time Chikama-san would wait until I finish my meal

- During lunch, I found out that most of the time males only sit with males and females only sit with females.
JAPANESE CULTURE

Nightlife near Kawaranmachi Dori

Kyoto Station
JAPANESE CULTURE

Fried Rise Ball

Fried Shrimp and Onions

Tofu with some type of soy sauce
