

Molecular Dynamics: Comparison of the Cytochrome P450 1A2 System

Tiffany Sun

Universiti Sains Malaysia

Penang, Malaysia

August 10, 2012

Project(s)

- My main project is on the molecular dynamic analysis on cytochrome P450 1A2 membrane-bound and waterbox systems.
- Another project is on on dengue (NS2B/NS3pro) laboratory with a master student, Rina. I'll be working on laboratory testing.

Progress

Had a powerpoint presentation on my project in the lab with Prof. Habibah.

Completed binding site analysis, protein height, and angle of the heme.

Did a neuraminidase assay in the experimental lab with Rina.

Goal for next week

Work on the final draft of my power point presentation.
Start working on my draft for PRIME research paper.

Write summary report(s) for some readings.

Write up my lab report for the experimental work I did last week.
