

Old-Town Osaka Viewer on Android Device
Osaka University
July 20, 2012

Sumin Wang

Progress

- Added live GPS positioning to augmented reality application
- Measured angle of physical camera
- Wrote application to test error of sensors on physical device
- Wrote application to test uploading large files to device

Goals for Next Week

- Correct errors with camera location in virtual world with respect to GPS coordinates
- Determine error from sensors and deal with accordingly. Filter out noise
- Upload large 3D file(s) into application and render only subset of models based on which are needed

*Tokoyaki, a creation of Osaka, brought to you fresh-made
by the Summer Festival at Osaka University*

Write something on your boat and set it in the water during the Tanabata (Star Festival) celebration at Umeda Floating Garden Observatory

Gion Festival in Kyoto
